PROFESSIONAL SUMMARY

Computer Science undergraduate with hands-on experience building responsive web applications using React.js, JavaScript (ES6+), HTML5, and CSS3. Proficient in REST API integration, reusable component architecture, DOM manipulation, and Webpack-based performance optimization. Familiar with Git workflows and UI/UX design principles. Actively strengthening DSA skills. Seeking a Software Engineering internship or entry-level SWE role.

EDUCATION

Ajay Kumar Garg Engineering College, Ghaziabad | B.Tech, Computer Science & Engineering | CGPA: 8.66/10 | 2024 – 2028

Coursework: Data Structures & Algorithms, OOP, DBMS, Software Engineering

Children College Azamgarh (CISCE Board) | Class XII: 93% | Class X: 95%

EXPERIENCE

Blockchain Research Lab (BRL), Ghaziabad | UI/UX Designer & Frontend Contributor | Dec 2025 – Present

- Contribute frontend development and UI/UX design to blockchain-based and real-world research projects in a collaborative R&D environment.
- Translate wireframes and design specs into responsive, accessible HTML/CSS components integrated within project repositories.
- Collaborate with cross-functional teams to align interface deliverables with technical requirements and timelines.

PROJECTS

Spotify Clone — HTML5, CSS3, JavaScript, Webpack

- Built a fully responsive music streaming interface with audio playback, play/pause controls, and track navigation.
- Applied CSS Flexbox and Grid for mobile-first layouts; configured Webpack for asset bundling and modular code structure.

NASA API Project — React.js, JavaScript

- Developed a React SPA to fetch and render real-time NASA public API data with reusable components and React Hooks (useState, useEffect).
- Implemented API integration with loading state indicators and error handling to improve perceived performance and reliability.

Quiz Web App — HTML, CSS, JavaScript

- Built an interactive quiz platform with dynamic score tracking, input validation, and event-driven DOM manipulation using vanilla JavaScript.

Biotic Milk – UI/UX Case Study — Figma, UX Research, Prototyping

- Conducted user research to identify usability and trust gaps; produced personas, empathy maps, task flows, and information architecture.
- Designed low- and high-fidelity wireframes and Figma prototypes; proposed subscription pause/resume and real-time delivery tracking features.

TECHNICAL SKILLS

Languages: C, C++, JavaScript (ES6+), HTML5, CSS3

Frontend: React.js, React Hooks, DOM Manipulation, REST API Integration, Responsive Web Design, CSS Flexbox & Grid

Tools: Git, GitHub, VS Code, Webpack, npm

Concepts: Data Structures & Algorithms, OOP, DBMS, Software Engineering, Version Control

Design: Figma, Adobe Illustrator, Wireframing, Prototyping, UX Research
