SUMMARY

Computer Science undergraduate with hands-on experience building responsive web applications using React.js, JavaScript, HTML5, and CSS3. Proficient in REST API integration, modular component architecture, and performance optimization. Actively sharpening DSA skills and backend fundamentals. Seeking a Software Engineering internship or entry-level role to contribute to production-grade projects.

TECHNICAL SKILLS

Languages C, C++, JavaScript (ES6+), HTML5, CSS3

Frontend React.js, React Hooks, DOM Manipulation, REST API Integration, Responsive Web Design, CSS Flexbox & Grid

Tools Git, GitHub, VS Code, Webpack, npm

Concepts Data Structures & Algorithms, OOP, DBMS, Software Engineering, Version Control

Design Figma, Adobe Illustrator, Wireframing, Prototyping, UX Research

PROJECTS

Spotify Clone **HTML5** · **CSS3** · **JavaScript** · **Webpack**

- Built a fully responsive music streaming interface with audio playback, play/pause controls, and track navigation across desktop and mobile viewports.
- Implemented mobile-first layouts using CSS Flexbox and Grid, eliminating layout breakage at all standard screen sizes.
- Configured Webpack for asset bundling and modular code structure, reducing estimated load time by ~30% through optimized chunking.

NASA API Project **React.js** · **JavaScript** · **NASA Public API**

- Developed a React SPA that fetches and renders real-time NASA public API data including live image feeds and metadata.
- Architected reusable functional components with React Hooks (useState, useEffect) for dynamic state management and responsive UI updates.
- Implemented API integration with loading state indicators and error boundary handling, improving perceived performance and user trust.

Quiz Web App **HTML** · **CSS** · **JavaScript**

- Built an interactive quiz platform with 20+ questions, dynamic score tracking, and client-side input validation using vanilla JavaScript.
- Enhanced user engagement through event-driven DOM manipulation, enabling instant feedback without page reloads.

EXPERIENCE

Blockchain Research Lab (BRL) — Ghaziabad, IN Dec 2025 – Present

UI/UX Designer & Frontend Contributor

- Contribute frontend development and UI/UX design to blockchain-based and real-world technical research projects in a collaborative R&D environment.
- Translate wireframes and design specifications into responsive, accessible HTML/CSS components integrated within project repositories.
- Collaborate with cross-functional teams to review technical requirements and deliver interface solutions aligned with project goals.

DESIGN PROJECT

Biotic Milk – UI/UX Case Study **Figma** · **UX Research** · **Prototyping**

- Conducted qualitative and quantitative user research to identify usability and trust gaps in milk delivery platforms, synthesizing findings into actionable design recommendations.
- Produced personas, empathy maps, task flows, and information architecture artifacts to restructure the core ordering experience.
- Designed low- and high-fidelity wireframes and interactive Figma prototypes; proposed subscription pause/resume and real-time delivery tracking features.

EDUCATION

Ajay Kumar Garg Engineering College — Ghaziabad, IN 2024 – 2028

B.Tech, Computer Science and Engineering | CGPA: 8.66 / 10

Relevant Coursework: Data Structures & Algorithms, OOP, DBMS, Software Engineering

Children College Azamgarh (CISCE Board) — Azamgarh, IN

Class XII: 93% | Class X: 95%
